## ELEMENTAL COLLECTION

spring 2022

Before you read another word, stop and look around you. Everything you can see, touch, and feel has been miraculously birthed by the elements. The water, wind, earth, fire, and sky above you are all inextricably linked to form the world as we know it. The elements have not only influenced our latest collection but created it itself. Each Elemental Collection fabric is as serene, calm, and divine as the nature surrounding you.

The Elemental Collections features 9 performance upholsteries that are inspired by the five enduring elements of nature. It is an ethereal collection that provides an everyday antidote to a beautifully unpredictable world.

# SERENE
