SHIELD LEATHERS

SHIELD LEATHERS

Performance Leather made of 100% Silicone, SHIELD Leathers redefine high performance fabrics through the best combination of leather textures and the superior advantages of silicone. It is inherently flame retardant and unlike polyurethanes (PU), silicone does not degrade from hydrolysis chemical. At the same time, it does not support microbiological growth.

In addition, SHIELD Leathers have been tested for high abrasion resistance with results of 200,000 double rubs (Wyznebeek) and 130,000 rubs (Martindale). This test method ensures fabric performance and durability, especially in high traffic areas. It is also highly resistant against stains such as ink, lipstick, coffee or wine stains, and betadine.

It is ideal for furniture upholstery and furnishings for a wide range of applications such as in:

- **Public areas** • **Transportation** • **Healthcare**
- **Indoor & Outdoor furniture** • **Residential**
- **Hospitality** • **Infant care** • **Marine** • **Education**

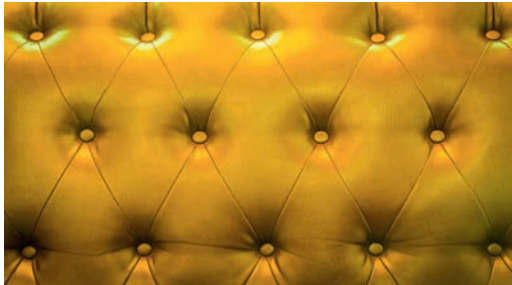

SHIELD Leathers can be customised for various types of applications such as:

- **Cushion Covers (indoor & outdoor)**
- **Wall Panels** • **Bed Frames** • **Bed Headboards**
- **Passenger Seats** • **Sofas** • **Seats**

PURE & PERFECT COLLECTIONS are available in an assortment of colours.

SHIELD Leathers Leathers boasts a versatile combination of vibrant and warm colours that attract the designer's eye.

Together with the innovative silicone technology and beautifully bold colours are crafted to be chosen from either the Pure or Perfect collections.

TEKLOOM

IDEAL FOR HEALTHCARE,
HOSPITALITY, COMMERCIAL

Tekloom

Tekloom is engineered using a new technology to chemically bond together a woven textile with the high-performance characteristics of a coated fabric - creating a durable, beautiful textile.

Fused Textile

Tekloom has created a new product category, a hybrid of a woven textile and coated fabric. It combines the aesthetic of a woven textile with the high-performance characteristic of coated fabrics to create a fused textile.

Ink & Stain Resistant Woven

Tekloom is the most ink & stain resistant woven textile in the industry. Stains can be easily cleaned with just a dry towel and water or an eraser so no complicated cleaning procedure will be necessary.

1 Million Double Rubs

Tested for abrasion by an independent lab, Tekloom passed over one million double rubs (Wyzenbeek) with no change on the surface. The surface TPE firmly protects the woven material.

Impermeable

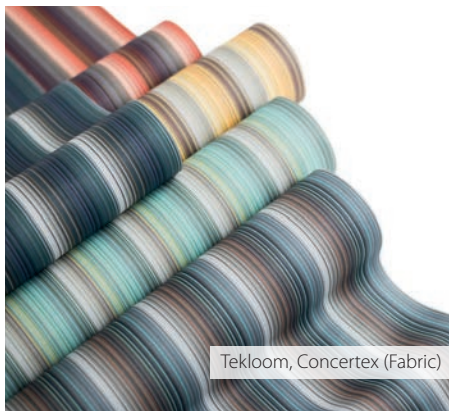

Tekloom is manufactured to include a moisture barrier on the surface, making the product impermeable, and prevents moistures, spills, and stains from entering the textile layer and foam underneath

Environmental

Tekloom is an environmentally friendly textile and is free of PFC (perfluorinated compounds), FR (flame retardants), anti-bacterial, DMF/PVC/Phthalates, and Red List chemicals.

Environmental Standards

Tekloom complies with California Prop 65, California 01350 VOC Standard and Healthier Hospitals Initiative.
